## Simplify to the Lowest Terms

$$1) \quad \frac{8}{10} - \frac{1}{2} - \frac{1}{5} = \frac{8}{10} - \frac{5}{10} - \frac{2}{10} = \frac{1}{10}$$

$$2) \quad \frac{9}{10} - \frac{1}{4} - \frac{1}{5} = \frac{18}{20} - \frac{5}{20} - \frac{4}{20} = \frac{9}{20}$$

$$3) \quad \frac{4}{5} - \frac{1}{3} - \frac{1}{5} = \frac{12}{15} - \frac{5}{15} - \frac{3}{15} = \frac{4}{15}$$

$$4) \quad \frac{4}{5} - \frac{1}{4} - \frac{3}{10} = \frac{16}{20} - \frac{5}{20} - \frac{6}{20} = \frac{5}{20} = \frac{1}{4}$$

$$5) \quad \frac{9}{10} - \frac{1}{4} - \frac{1}{5} = \frac{18}{20} - \frac{5}{20} - \frac{4}{20} = \frac{9}{20}$$

$$6) \quad \frac{8}{10} - \frac{1}{2} - \frac{2}{10} = \frac{8}{10} - \frac{5}{10} - \frac{2}{10} = \frac{1}{10}$$

$$7) \quad \frac{4}{5} - \frac{1}{5} - \frac{3}{10} = \frac{8}{10} - \frac{2}{10} - \frac{3}{10} = \frac{3}{10}$$

$$8) \quad \frac{4}{5} - \frac{1}{3} - \frac{3}{10} = \frac{24}{30} - \frac{10}{30} - \frac{9}{30} = \frac{5}{30} = \frac{1}{6}$$

$$9) \quad \frac{8}{10} - \frac{1}{4} - \frac{2}{10} = \frac{16}{20} - \frac{5}{20} - \frac{4}{20} = \frac{7}{20}$$

$$10) \quad \frac{4}{5} - \frac{2}{5} - \frac{3}{10} = \frac{8}{10} - \frac{4}{10} - \frac{3}{10} = \frac{1}{10}$$
